PROJECT EXPERIENCE

NumNums! — Restaurant Locator App (In Progress)

- A web based App built with Java, Spring, Thymeleaf, MySQL, and HTML.
- Allows users to search for dining options based on special dietary needs and within a specified area.
- Utilizes a database of user accounts and restaurant details with create, read, update, and delete functionality.

Blogz — LaunchCode school project

- A web based project built with Python, Flask, SQLAlchemy, Jinja, MySQL, and HTML.
- Allows users to signup, create, and read blog posts.

WORK EXPERIENCE

Instructor — Music Folk Inc., St. Louis, MO

April 1996 - Present

- Provided individual instruction on guitar, mandolin, ukulele, and bass guitar for an average of 60 students each week.
- Presented group workshop classes for guitar and ukulele using original content.
- Developed a personalized curriculum that drew from a wide variety of styles in order to help each student achieve their goals.

Apprentice Electrician — Moxie Construction, St. Louis, MO

September 2016 - June 2018

- Provided hands-on assistance to a master electrician in all aspects of the trade.
- Was responsible for the installation and maintenance of electrical systems in residential, commercial, and industrial projects.
